## **DETAILED ACTION**

Page 2

1. Claims 5-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from a multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-11 have not been further treated on the merits.

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claims 1-4 and 14 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 1, the phrase "A disruptor for constituting an explosive charge" is vague and indefinite. It is not clear how a disruptor would form or constitute an explosive charge. Claim 14 is indefinite since it has no period dot to indicate that the claim is complete.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 5. Claims 1-4 and 12-15 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Brion et al (5,493,973).

See especially column 1, lines 9-13; column 5, line 64 – column 6, line 12; column 6, lines 50-58; and column 7, lines 7-13 and 45-56. Note that the barrel of the gun (column 1, line 4 and column 5, line 40) in which the propulsive charge is loaded is considered the "container". If the entire volume of element 2 is considered the "enclosure" then the

Art Unit: 3644

spacer element (e.g. threads 22C) are in the enclosure, but if the enclosure is considered only the portion inside the volume formed with element 3, then the spacer element is outside enclosure. Either reading is allowable in view of the claim language.

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Beal is cited as being of interest since it discloses a variable charged device.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Woodrow Eldred whose telephone number is 571-273-6901. The examiner can normally be reached on Monday to Thursday, from 8:00 a.m. to 5:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Teri Luu can be reached on 571-272-7045. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
